

## RANGE DESIGN

# Palanca

### Flexible PVC hose for water transport at medium pressures and frequent use

Insert in range Design, Palanca is an excellent flexible PVC garden hose with three layers, with a good distribution one wall thickness of layers, which makes it suitable for frequent use at medium pressure.

$\varnothing_{int}$ (mm)	$\varnothing_{ext}$ (mm)	Weight (g/m)	Bursting pressure (bar)	Length (m)	Resistance to traction
15 (5/8")	19,2 ± 0.5	140	21	15   25   50	Tensile strength: ≥ 5 MPa Elongation at break: ≥ 150 %
19 (3/4")	24,3 ± 0.5	220	20	25   50	Adhesion: ≥ 15 N/cm

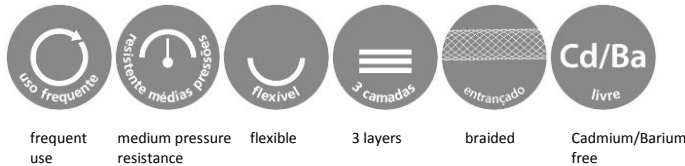

#### Distribution of the 3 layers:

1. PVC layer flexible, green.
2. Braided layer with high resistance polyester yarn, white.
3. PVC layer flexible, black with two red stripes and one yellow stripe.

### Other characteristics

**Material:** Plasticized poly (vinyl chloride), plasticizers and other additives necessary to facilitate the production. The material used does not contain lead, cadmium or barium.

#### Technical:

#### Use:

Used in gardening, washing cars and rides, agriculture, construction and transport water for general use at a recommended temperature of -10°C/+60°C.

### Remarks for use:

The recommend fittings for this hose are the plastic click fitting in colour grey/grey. Easy cut with a knife or scissors. For a good performance, it should be avoid trampling the hose, especially with machines or heavy equipment. To increase the durability, the hose should be wrapped and kept clean without water after each use.

- 1 Spray Nozzle Click
- 2 Hose connector Click
- 1 Tap Adaptor Click

The information and data assume is accurate and reliable.

The characteristics can be improved as a result of technological advances and improvements.

Our Quality Department is at your disposal for any clarification.
